

1

Ans: India is 3rd second in terms of the fish producing in the world and 2nd in terms of aquaculture in the world. The blue revolution plays the significant challenging role in developing fishery sector.

3.5/12

Challenges presented by the fishery sector in the India :-

1) Infrastructure :-

most of the vessels of the India's fisherman's, are using old technology.

2) Socio economic :-

Good Points:
You need to substantiate your points with data/fact

The fund is less in terms of maintaining the fishery sector.

3) Regional Issue :-

Some time the regional people catch the same fish illegally.

Refer model ans for same.

④ International Issue:-

The fishermen sometime crossed the border in the sea and the Sri Lankan army put them into the jail.

⑤ Climate change:-

Due to temperature increasing the sea water is warming and the fishes are dying.

★ Government Initiative to tackle the fishery issues:-

① Pradhan Mantri Matsya Sampad

Yojana

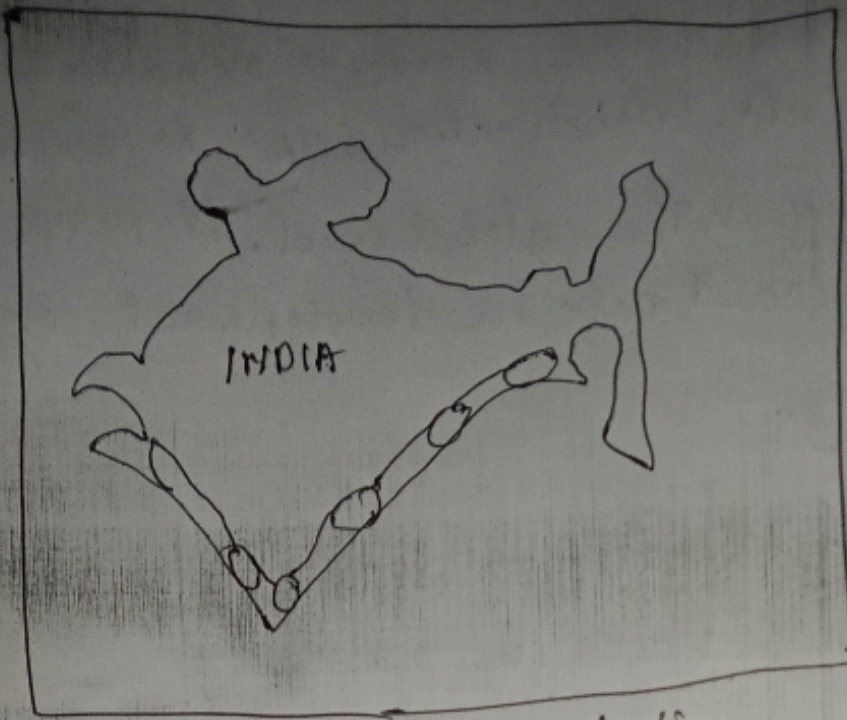

② Kisan Credit Card Scheme

③ Bay Scheme

④ Sea Parikrama Project

⑤ Fishery and Aquaculture Development Fund
